PROFESSIONAL SUMMARY

Experienced Fullstack Developer with a strong background in web development and Data Science. Proven expertise in developing scalable software solutions, performing data analysis, and implementing machine learning models. Skilled in various programming languages, frameworks, and cloud platforms. Passionate about continuous learning and applying new technologies to solve real-world problems.

EDUCATION

- Post Graduate studies **Computer Software and Database Development**, Lambton College (2016 - 2018)
- Bachelor of Engineering in BioInformatics SRM University, India (2011 - 2015)

LIST OF PROJECTS:

- Data visualization using **Tableau**:
 1. <https://public.tableau.com/app/profile/vaishali.sr3847/viz/healthcareanalyticsstory/HealthcareAnalyticsStory>
 2. https://public.tableau.com/views/healthcareanalytics_17147758469860/HealthcareSummaryReport?:language=en-US&:sid=&:display_count=n&:origin=viz_share_link
 3. https://public.tableau.com/views/superstore-project_17147750493750/SalesDashboard?:language=en-US&:sid=&:display_count=n&:origin=viz_share_link
- Using React, Redux and Firebase: <https://github.com/somurameshvaishali24nov/ReactProject>
- Using Python, Flask and MongoDB: <https://github.com/somurameshvaishali24nov/Employee-Management-System-Python>
- Using MEAN (Mongo, Express, Angular and NodeJS): <https://github.com/somurameshvaishali24nov/MeanStack-Todo-App>

TECHNICAL SKILLS

- **Programming Languages:** Python, Core Java, C#, JavaScript, Ruby, SQL, Golang
- **Web Development:** HTML, CSS, Bootstrap, JQuery, JavaScript, Node.js, ReactJS, AngularJS, Angular 8+, Vue.js, MeteorJS
- **Data Science & Machine Learning:** Pandas, NumPy, Scikit-learn, PySpark, Azure Databricks
- **Data Visualization:** Tableau, Power BI
- **Databases:** MongoDB, SQL, SQLite, MSSQL Server
- **Tools & Platforms:** Blue Prism, AWS, Azure, Docker, Kubernetes, Git, JIRA, Confluence, Postman, Elasticsearch
- **Process Automation:** Blue Prism
- **Hardware:** Raspberry Pi

CERTIFICATIONS:

- IOT and Web specialist Certified, Sarnia Lambton Youth Skills Connection.
- Advanced Manufacturing Material Certified, Sarnia Lambton Youth Skills Connection

EXPERIENCE

Infin8 IT, Toronto, ON Developer Developer

Mar 2026 to Present

- **Designed, developed, and maintained** robust, scalable, and high-performance backend services and data processing pipelines using **Python**, leveraging frameworks such as **Django, Flask, and FastAPI**.
- Built and managed **RESTful APIs**, integrating with both internal and external systems to support business-critical workflows.
- Applied strong **object-oriented programming (OOP)** principles, design patterns, and efficient data structures to write clean, well-documented, and maintainable code.
- Worked extensively with **relational databases (PostgreSQL, MySQL)** and **NoSQL databases (MongoDB)**, optimizing queries and schema design for performance.
- **Deployed and managed microservices** using **Docker and Kubernetes** across **AWS and Azure** cloud platforms.
- Integrated **message queues** such as **Kafka and RabbitMQ** to enable reliable asynchronous, event-driven communication between services.
- Developed and maintained automated tests using **Pytest and unittest**, ensuring high code coverage and application reliability.
- Contributed to all phases of the development lifecycle including requirements gathering, design, coding, testing, deployment, and ongoing support.
- Participated in **code reviews** to uphold code quality, maintainability, and adherence to coding standards, while **mentoring junior engineers**.
- Managed **CI/CD pipelines** and applied **DevOps practices** to streamline builds, testing, and deployments.
- Troubleshooted, debugged, and upgraded existing systems to improve functionality and performance.

PAR Technology Corporation (Punchh Canada) Senior Fullstack Developer

June 2021 to Present

- **Led development of scalable backend services** using **Ruby on Rails** and frontend using **VueJs, Typescript**, building RESTful APIs for high-volume transaction systems for 200+ global brands.
- Built and maintained Rails applications following MVC architecture and REST principles.
- **Architected and optimized complex database queries** using ActiveRecord and **PostgreSQL and MySQL** and ActiveRecord patterns reducing N+1 query issues and improving API response times by 60%.
- Created and maintained Rails migrations to support evolving database schemas.
- **Engineered asynchronous background processing** using **Sidekiq and Redis**, ensuring reliable execution of mission-critical tasks and system stability.
- **Collaborated cross-functionally** with Product Managers and Designers to translate roadmap visions into technical specifications and production-ready code.
- **Mentored junior engineers** through rigorous **code reviews** and architectural planning sessions, fostering a culture of high-quality, well-tested code (RSpec).
- **Managed containerized deployments** using **Docker and Kubernetes** within an **Azure DevOps** CI/CD pipeline, maintaining 99.9% application uptime.
- **Architected AI-driven agentic workflows** using **n8n and DevRev** to automate complex, multi-step daily operational tasks, significantly reducing manual intervention for errors sent by Customer
- **Managed version control and collaborative development** across distributed teams using **Git/GitHub**, maintaining a clean codebase through structured branching and pull request workflows.
- Debugged and resolved production issues using **Rails console and Kubernetes pods**, applying advanced debugging skills.
- Built internal Rails tools for production support and operational workflows.
- Wrote unit and integration tests using **RSpec** to ensure application reliability.
- Implemented **caching strategies using Redis** to improve response times.
- Worked with **Kafka-based** messaging systems integrated with Rails services.

- Built and maintained **REST API integrations** with external systems.
- Developed secure endpoints with authentication and authorization.
- Familiarity with machine learning frameworks and libraries (**like scikit-learn**).
- Worked exclusively on **Python, Pandas, NumPy, JavaScript, PySpark, Azure Databricks, SQL, MongoDB, GraphQL, Vue, Redis, and Golang (Go)**.

Jonas Software, Markham ON

February 2019 to June 2021

Web Developer

- Planned, designed, and tested frontend applications using **Angular 8+, Typescript, Lodash, and Bootstrap, integrating with SQL Server and MongoDB databases.**
- Working knowledge of advanced JavaScript libraries and frameworks, such as **AngularJS, Angular 9, etc**
- **Participated in architectural planning** and rigorous **code reviews**, providing feedback to peers to ensure software scalability and security.
- Deep functional knowledge in **REST API development and SOAP web services.**
- Conduct test and perform security and quality controls
- Experience with **Git, Azure DevOps, and version control for source code** management, along with **JIRA and Confluence.**
- Collaborated with Team members and provided ideas for improving the web application
- Working knowledge of **asynchronous request handling, and AJAX**
- Proficient understanding of code versioning tools, such as Git.
- Build reusable code and libraries for future use

Industrial Web Apps (IWA), Sarnia, ON

September 2018 to January 2019

Web Developer

- Work experience with Web Applications and programming languages such as **HTML5, CSS3, Bootstrap, Javascript (ReactJS, MeteorJS), ES6, Docker, Elasticsearch, Mocha and MongoDB** in Linux Platform using IDE Microsoft Visual Studio Code (Code Editor)
- Experience with **Git and version control** for source code management, Bitbucket and JIRA
- Testing site functionality, identifying problems or bugs and fixing errors
- Collaborated with Team members and provided ideas for improving the web application
- Developed and Maintained web components and websites for new and existing clients
- Communicated with client's in order to meet their requirements and develop the projects efficiently
- Maintained and enhanced company software

Royal Bank of Canada, Toronto

January 2018 to August 2018

RPA Developer (Robotic Process Automation Developer) - Blue Prism

- Implemented 3 End to End process automations that resulted in reduction of 3 FTE's(Full Time Employees) and 80% work
- Automated processes by integrating complex Web, Windows Application and Outlook Applications using **Blue Prism** (Object and Process studio) using SDLC (Agile/Scrum methodologies)
- Having experience in **Blue Prism database (SQL SERVER 2012).**
- Familiar with **C#, .NET, JAVA, Python, JSON, Web services and SQL Database (MSSQL Server)**
- Building dashboard using **Elasticsearch** for monitoring **Robotic Performance**
- Work experience in installation, configuration, maintenance and integration, **Elastic stack** for building a dashboard used ELK exclusively (**Elasticsearch, Beats, Logstash and Kibana**) and logging tool and **x-pack** features
- Worked in different operating systems like **Windows Server 2012 R2, Windows 7, 10, Red Hat Linux and Ubuntu.**
- Used **Postman, Shell scripting, Linux and Windows commands, cURL commands, Microsoft SQL Server Management (MSSM), SQL (RDBMS), Painless Scripting Language and Blue Prism.**
- Professional Experience in **ECE** (Elastic Cloud Enterprise) and **Elastic Cloud Compute (EC2).**
- Hands-on experience in the full life cycle of automation solution document.
- Experience working in an agile environment.
